

Salvatore Desole

Technical Designer & Web Developer

Ever since I worked in architectural design and 3D modeling, I have developed a strong passion for creating solutions that combine functionality and visual clarity. My interest in software development stems from the desire to transfer this creative and analytical approach into a more dynamic and innovative context, where technology becomes a tool to solve concrete problems and improve user experience. I am currently completing my degree, while also operating as a freelancer (VAT registered) to combine the technical precision gained in architecture with the ability to shape intuitive and impactful digital products.

Education

Full-Stack Developer Bootcamp

EPICODE Institute of Technology

Nov 2024 - Jun 2025

An intensive 6-month program with over 800 hours of hands-on training. Covered Front-end, Back-end, and Database modules. Developed the ability to manage end-to-end projects and work effectively in fast-paced, multidisciplinary teams.

Degree in Architecture, Urban Planning, and Design

University of Sassari - 180 CFU

Ongoing

High School Diploma - Architecture Laboratory

Liceo Artistico Filippo Figari

Technical Projects & Portfolio

Final Web Project

Archiplanner - Final Course Project

A management platform designed to simplify, organize, and store architectural projects. Built with a React and Redux (JavaScript) frontend, integrated with a Java/Spring Boot backend and a PostgreSQL database. The project features Google services integration and external libraries such as FullCalendar and date-fns. APIs are fully documented and automatically tested with Swagger, and the entire system is version-controlled via Git/GitHub.

Professional Experience

February 2020 - June 2024

Technical Collaborator - Arch. Zaccheddu

Technical Collaborator - ESSECIQUADRO ASSOCIATI (Arch. & Eng)

Real Estate Consultant - Tecnorete Sassari

Intern - Pixel Architecture Studio

I have worked in various environments - primarily architectural firms and technical development companies, as well as gaining experience as a consultant in a real estate agency. My roles have ranged from intern to full-time and part-time collaborator. These experiences allowed me to develop:

- Effective Communication:** interacting with clients, colleagues, and suppliers; translating complex needs into clear requirements and sharing project updates.
- Teamwork:** collaborating with multidisciplinary teams (architects, engineers, technicians), coordinating activities, and meeting shared deadlines.
- Problem Solving:** analyzing design and organizational issues, proposing practical solutions, and quickly adapting to new challenges.
- Time and Priority Management:** simultaneously balancing multiple tasks, planning work independently, and ensuring project milestones are met.
- Client Orientation:** understanding users' true needs, building trust-based relationships, and ensuring high satisfaction levels.
- Adaptability and Flexibility:** integrating new technologies and workflows, quickly learning digital tools (CAD, BIM, GIS, 3D modeling software), and adapting to dynamic contexts.

Tech Skills

- SOFTWARES CAD, BIM, GIS & ACCA
 - SOFTWARES MODELLAZIONE 3D - REVIT, SKETCHUP, BLENDER
 - ADOBE, OFFICE
-
- HTML/HTML5, CSS & BOOTSTRAP
 - REACT, REDUX & JAVASCRIPT
 - NEXT, TYPESCRIPT & TAILWIND
 - FULL SPRINGBOOT & JAVA
 - POSTGRESQL - GIT - POSTMAN - SWAGGER
